GPV Interactive Report to MSeXcel

Overview

Introduction

The "GPV Interactive Report to Excel" APEX plugin provides a simple export of IR-data into Microsoft Excel.

Features at a Glance

These Interactive Reports features are supported:

- Correct export of data types (String/Date/Number)
- Filtering and Sorting
- Control Break
- Computations
- Aggregations
- Highlighting
- Auto adjustable Column Width
- Date/Number Formats
- Custom downloaded file name (see FAQ)
- Can be easy implemented for all Interactive reports in an application (see FAQ)

License

The "GPV Interactive Report to MSeXcel" APEX plugin and IR_TO_XML, XML_TO_XSLX, IR_TO_MSEXCEL packages are currently available for use in all personal or commercial projects under both the MIT and GPL licenses. This means that you can choose the license that best suits your project and use it accordingly. Both licenses have been included in this software.

Legal Disclaimer

The program(s) and/or file(s) are supplied as is. Found a bug

If you have found a bug, please send us debug information. To do this, set **Return Data** plugin options to "Debug Information". Try to get your data again. You'll get text a file with debug information.

Please send this file to pavelglebov@outlook.com.

GPV Interactive Report to MSExcel

Installation

Install required packages

This plugin requires IR_TO_XML, XML_TO_XSLX, IR_TO_MSEXCEL, APEXIR_XLSX_PKG.sql and AS_ZIP packages. To install these packages, please use the all-in-one installation script install_all_packages.sql.

To do this, navigate to the “SQL Workshop > SQL Scripts”. Upload file **install_all_packages.sql**.

GPV Interactive Report to MSeExcel

Install plugin

Navigate to “Shared Components > Plug-ins” and click **Import**. [This Oracle document](#) shows you how to upload the plugin-file “dynamic_action_plugin_at_frt_gpv_ir_to_msexcel.sql” and to install the plug-in using the file above.

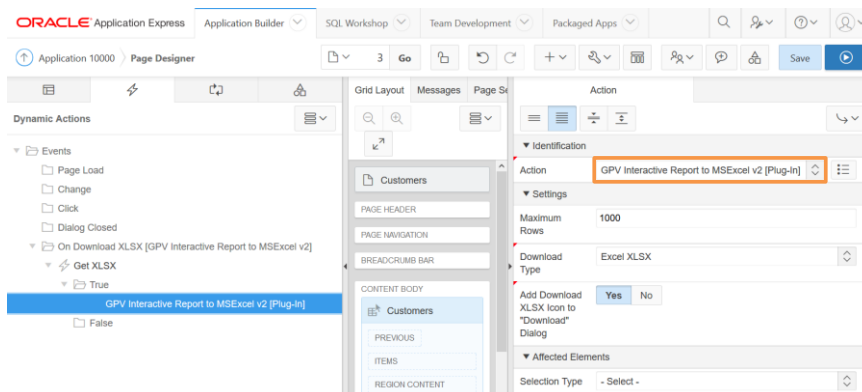

Using in your application

1. Create a new Dynamic Action on Event “On Download XLSX[GPV Interactive Report to MSeExcel v2]”.

Set

- “Selection Type” => “jQuery Selector”
- “jQuery Selector” => “document”

Select “Action” => “GPV Interactive Report to MS Excel v2”

GPV Interactive Report to MSeXcel

The plugin is ready to use with the default settings.

How it works

The plugin adds “Download XLSX” Icon to the “Download menu”. By pressing on this icon the user gets an XLSX-file.

Kommentiert [GP1]: How. I have the feeling that the Javascript IR2MSEXCEL.js needs to be used as well. I see no XLSX icon in the menu.

Customer Id	Cust First Name	Cust Last Name	Cust Street Address1	Cust Street Address2	Cust Postal Code	Cust Email	Phone Number1	Phone Number2
1	John	Dulles	45020 Aviation Drive	-	20166	john.dulles@email.com	703-555-2143	703-555-8967
2	William	Hartsfield	6000 North Terminal Parkway	-	30320	-	404-555-3285	-
3	Edward	Logan	1 Harborside Drive	-	02128	-	617-555-3295	-

5	Fiorello	LaGuardia	Hangar Center	Third Floor	11371	-	212-555-3923	-

Installing a separate rendering engine from Moritz Klein (commi235).

Download and install all required packages from GitHub (https://github.com/commi235/APEX_IR_XLSX). The existing (mock) package APEXIR_XLSX_PKG.sql must be replaced.

After that you can use “Download Type” => “commi235 Render Engine”

GPV Interactive Report to MSExcel

GPV Interactive Report to MSeExcel

Configuration Settings

Return Data

Choose "Excel XLSX" to return the Interactive Report as a MS-Excel file.

Choose "XML (Debug)" to return the Interactive Report in XML format.

Choose "Debug TXT" to view debug information.

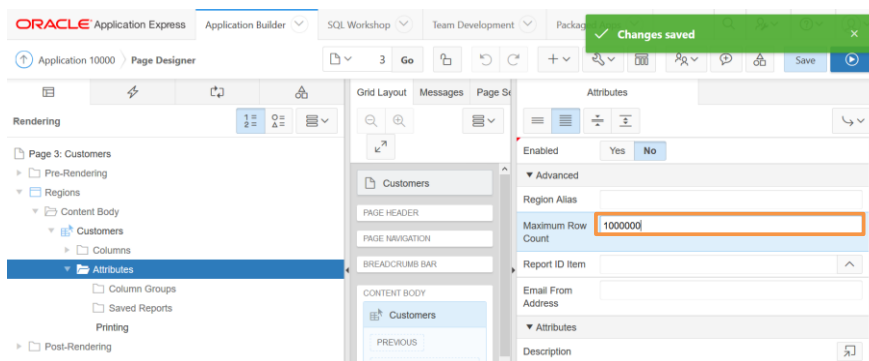

Choose "commi235 Render Engine" to use a separate render engine from Moritz Klein (needs to be installed separately).

Maximum Rows

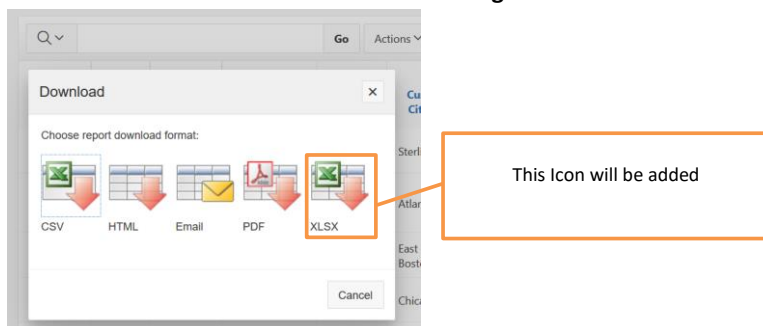

Rows greater than this value will not be exported.

To export all the rows set the value to 1000000000.

When empty - value from Interactive Report Attributes-> Maximum Row Count will be used.

Add Download XLSX Icon to "Download Dialog"

GPV Interactive Report to MSeXcel

FAQ (How to)

Replace default file name (Excel.xlsx) to the custom file name

When not empty, the value from *Report Attributes*-> *Filename* field will be used.

Use this functionality for all Interactive reports in your application

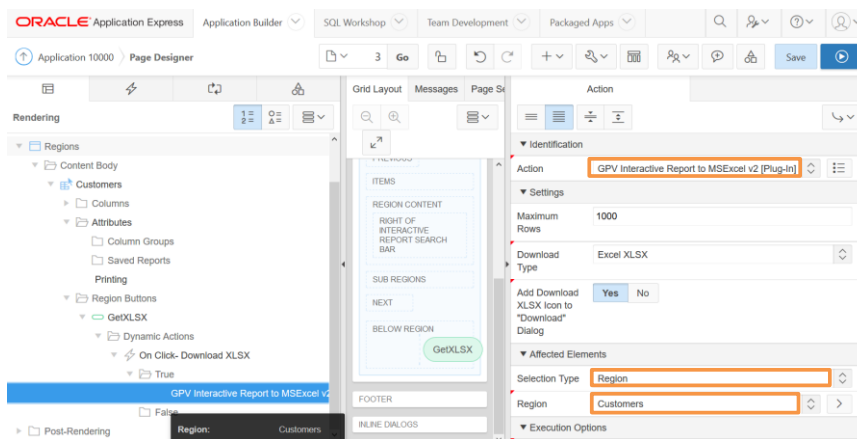

Install the plugin on Page 0 as described above in “Using in your application” section.

When you want to exclude this functionality from a couple of pages, use **Conditions**.

Adding a custom download button

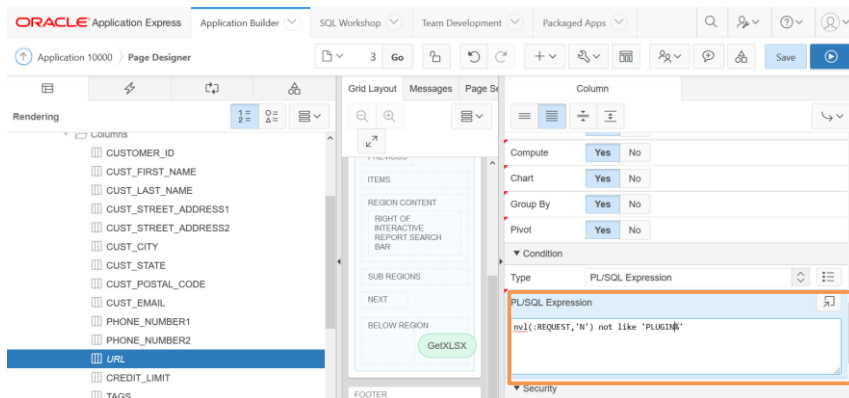

1. First create a Button
2. Create Dynamic Action on Event “Click” for this Button.
3. Create True Action and set “Action” to “GPV Interactive Report to MSeXcel v2 [Plug-in]”.
4. In “Affected Elements” Section set “Selection Type” => “Region”.
5. Set “Region” to your IR report Region.

GPV Interactive Report to MExcel

How to exclude report columns from export/make columns that are visible in Excel but not visible in Interactive Report

Use **Conditional Display** column property for this.

Use `nvl(:REQUEST,'N') not like 'PLUGIN%'` Expression to exclude column from export, and `nvl(:REQUEST,'N') like 'PLUGIN%'` Expression to make column visible on export only.
