Found a bug

If you have found a bug, please send us debug information. To do this, set **Return Data** plugin options to "**Debug Information**". Try to get your data again. You'll get text a file with debug information. Please send this file to pavelglebov@outlook.com.

Installation

Install required package

This plugin requires IR_TO_XML, XML_TO_XSLX, IR_TO_MSEXCEL, APEXIR_XLSX_PKG.sql and AS_ZIP packages. To install these packages, please use install_all_packages.sql all-in-one installation script.

To do this, navigate to the “SQL-Workshop > SQL-Scripts”. Upload file **install_all_packages.sql**.

GPV Interactive Report to MSeExcel

Install plugin

Navigate to “*Shared Components > Plug-ins*” and click **Import**. [Herefrom](#) you can follow the menu to upload plugin-file “**process_type_plugin_gpv_ir_xml.sql**” and to install the plug-in using the file above.

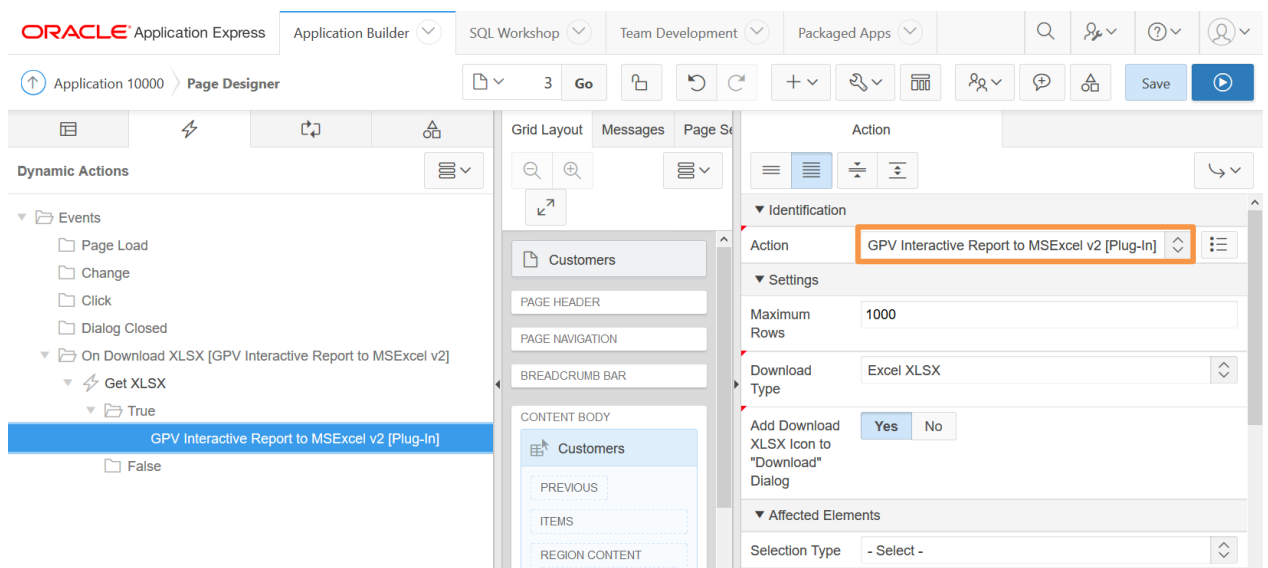

Using in your application

1. Create new Dynamic Action on Event “**On Download XLSX[GPV Interactive Report to MS Excel v2]**”.

Set

- “*Selection Type*” => “**jQuery Selector**”
- “*jQuery Selector*” => “**document**”

Select “*Action*” => “**GPV Interactive Report to MS Excel v2]**”

GPV Interactive Report to MSeExcel

Plugin is ready to use with default settings.

How it works

Plugin add "Download XLSX" Icon to the "Download menu". By pressing on this icon user get an XLSX-file.

Customer Id	Cust First Name	Cust Last Name	Cust Street Address1	Cust Street Address2	Cust City	Cust State	Cust Postal Code	Cust Email	Phone Number1	Phone Number2

Installing separate rendering engine from Moritz Klein (commi235).

Download and install all required packages from GitHub (https://github.com/commi235/APEX_IR_XLSX). Existing package APEXIR_XLSX_PKG.sql must be replaced.

After that you can use "Download Type" => "commi235 Render Engine"

GPV Interactive Report to MSeExcel

Configuration Settings

Return Data

Choose "Excel XLSX" to return result of Interactive Report as MS-Excel file.

Choose "XML (Debug)" to return result of Interactive Report in XML format.

Choose "Debug TXT" to view debug information.

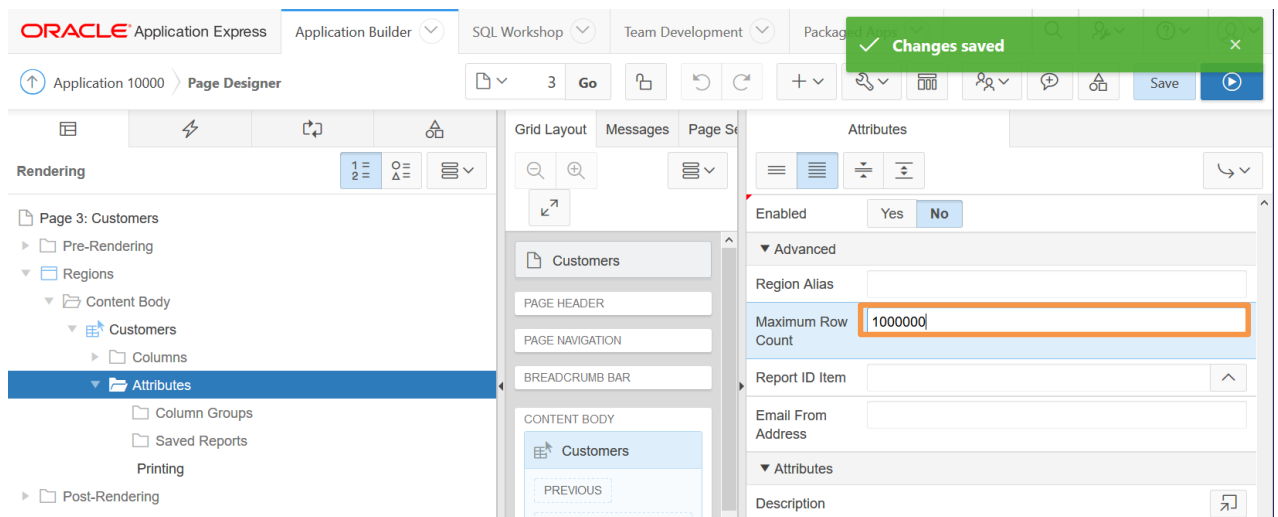

Choose "commi235 Render Engine" to use separate render engine from Moritz Klein (need to be installed separately).

Maximum Rows

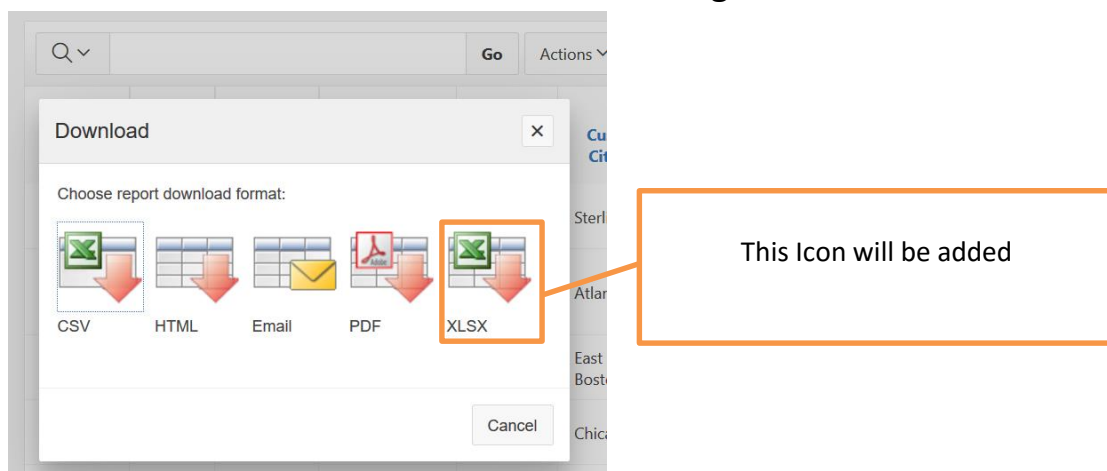

Rows greater than this value will not be exported.

To export all the rows set the value to 1000000000.

When empty - value from Interactive Report Attributes-> Maximum Row Count will be used.

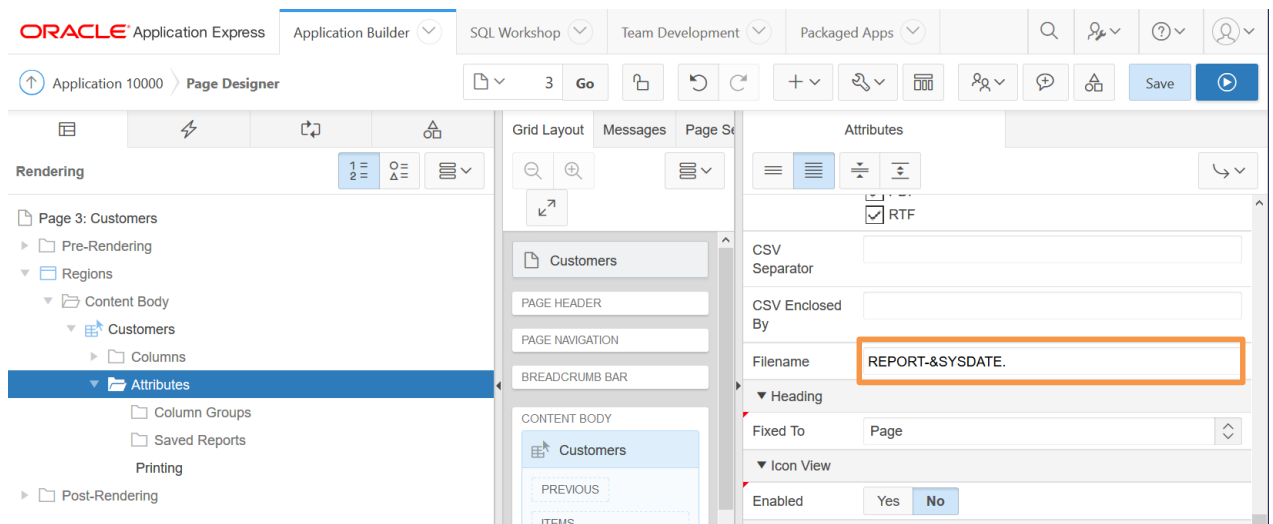

Add Download XLSX Icon to "Download Dialog"

FAQ (How to)

Replace default file name (Excel.xlsx) to the custom file name

When not empty, value from *Report Attributes-> Filename* field will be used.

Easy implement this functionality to all Interactive report in your application

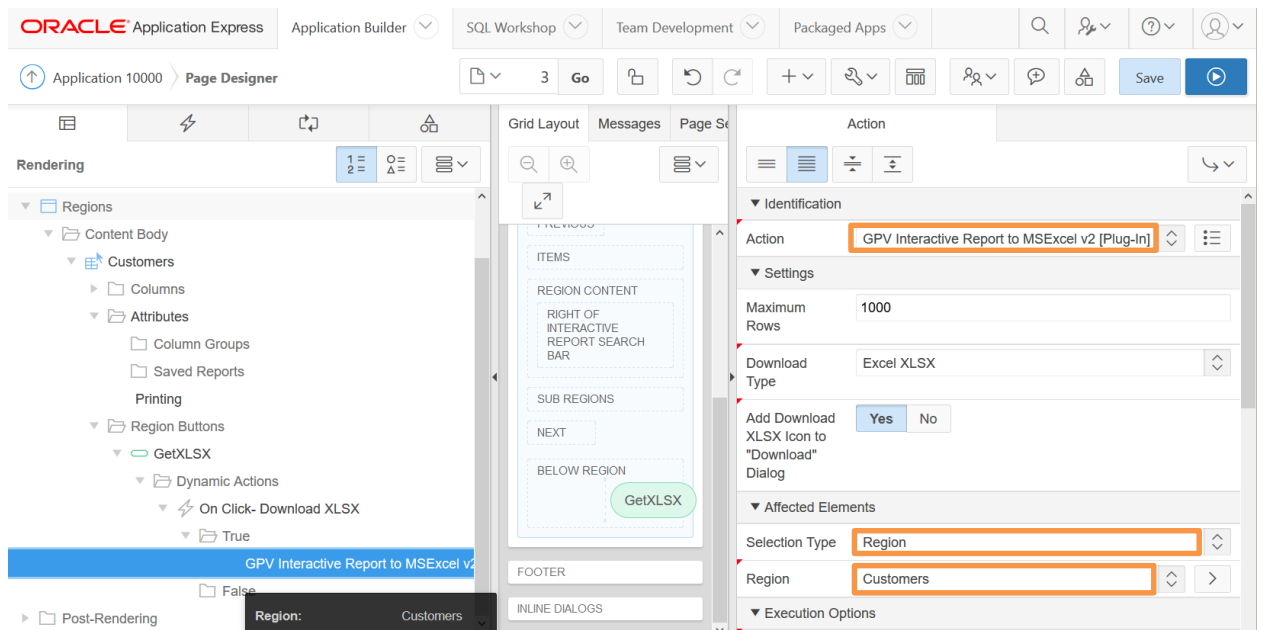

Install plugin on Page 0 as described above in “Using in your application” section.

When you want to exclude this functionality from couple of pages, use **Conditions**.

Adding custom download button

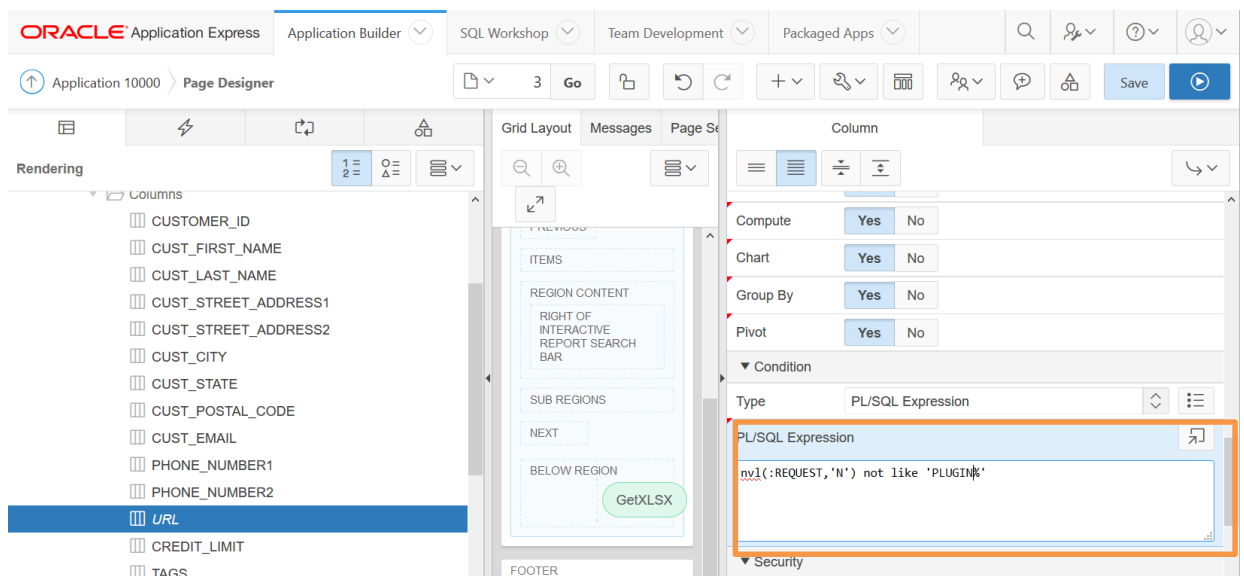

1. First create a Button
2. Create Dynamic Action on Event “Click” for this Button.
3. Create True Action and set “Action” to “GPV Interactive Report to MSeExcel v2 [Plug-in]”.
4. In “Affected Elements” Section set “Selection Type” => “Region”.
5. Set “Region” to your IR report Region.

GPV Interactive Report to MSExcel

How to exclude reports columns from export/make columns that are visible in Excel but not visible in Interactive Report

Use **Conditional Display** column property for this.

Use `nv1(:REQUEST,'N') not like 'PLUGIN%'` Expression to exclude column from export, and `nv1(:REQUEST,'N') like 'PLUGIN%'` Expression to make column visible on export only.
